

Phase 6 – Testing & Validation

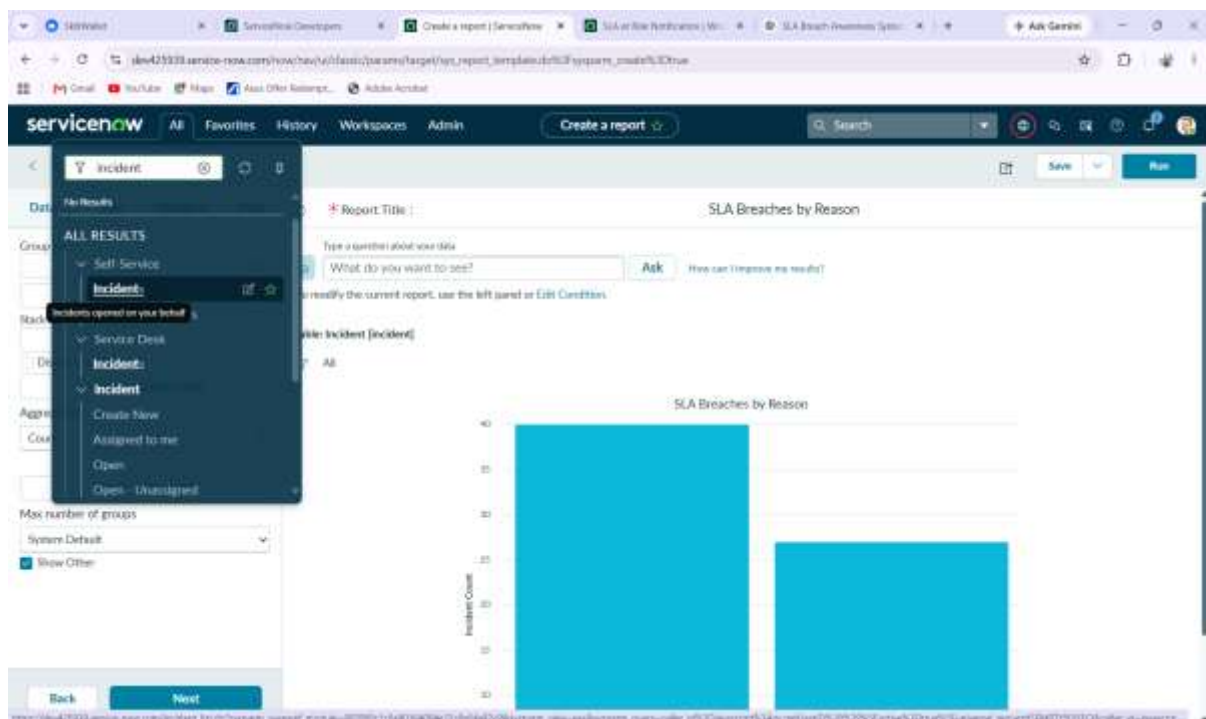

Test Case 1: Incident Creation and SLA Attachment

Objective

To verify that a new Incident can be created successfully and that the **Incident Resolution – Virtual Agent Governance** SLA is automatically attached.

Navigation

Incident → Create New

Test Steps

1. Open the **Incident** module.
2. Click **Create New**.
3. Enter all mandatory Incident details.
4. Assign the Incident to a user or assignment group.
5. Click **Submit**.
6. Open the newly created Incident.

7. Verify that the **Incident Resolution – Virtual Agent Governance SLA** is attached.

Incident - Create INC0010001

Number: INC0010001

Caller: System Administrator

Watch list

Number	Opened	Short description
INC0010001	2026-07-08 03:55:00	hi
INC0000111	2019-07-22 14:04:37	ATP : Text

1 to 2 of 2

Expected Result

- Incident is created successfully.
- A unique Incident Number is generated.

- The Incident Resolution SLA is automatically attached.
 - The SLA starts running based on the configured business schedule.
-

Actual Result

The Incident was created successfully, and the **Incident Resolution – Virtual Agent Governance** SLA was automatically attached. The SLA timer started correctly according to the configured business schedule.

Conclusion

This test confirms that the Incident creation process functions correctly and that the SLA is automatically applied, providing the foundation for proactive SLA monitoring and governance.
