

Test Case 5 – UI Policy Validation

Objective

To verify that the assignee can update the SLA governance fields when an Incident is marked as **SLA At Risk**.

Steps

1. Open an Incident where **SLA At Risk = True**.
2. Verify the SLA-related fields on the Incident form.
3. Attempt to update the required fields.

Expected Result

- **SLA Breach Reason** is **Editable** and **Mandatory**.
- **SLA Breach Justification** is **Editable** and **Mandatory**.
- **SLA Acknowledgement** is **Editable** and **Visible**.

Actual Result

The UI Policy worked as expected. The **SLA Breach Reason** and **SLA Breach Justification** fields became mandatory and editable, while the **SLA Acknowledgement** field was visible and editable when **SLA At Risk** was set to **True**.
