

## Test Case 6 – Virtual Agent Validation

### Objective

To verify that the Virtual Agent guides users through SLA governance using a conversational interface.

### Steps

1. Navigate to the **Service Portal**.
2. Open the **Virtual Agent**.
3. Select the "**SLA Breach Awareness & Justification**" topic.

### Expected Result

- An SLA warning message is displayed.
- SLA governance instructions are shown to the user.
- The user is guided to provide the required SLA breach information.

### Actual Result

The Virtual Agent displayed the SLA warning message successfully and guided the user through the required SLA governance steps as expected.
